► HUTCHINSON 1-PIECE AND 2-PIECE ALUMINUM WHEELS

Hutchinson has provided tactical wheel solutions to the military, security and commercial markets for decades. Hutchinson wheels have been field-tested and continue to perform in all major military conflicts. That same performance is available to Special Operations Forces in a low visibility package. The wheel, with a high mobility runflat and beadlock combination, looks just like a standard original equipment wheel with increased load capacity and mobility.

- Up to 60% unsprung weight reduction
- Increased mileage
- Optional central tire inflation system (CTIS)
- Complete wheel assemblies available

Low-Visibility 2-Piece aluminum wheel

► HUTCHINSON RUNFLATS

Tires can be the primary target to immobilize a wheeled vehicle. It is vital that a vehicle can escape at high speeds or complete its mission with one or all the tires flat. The Hutchinson Runflat has proven to be priceless to the protection of the passengers and its vehicle.

- Lightweight runflats for 1-piece wheels
- Heavy Duty runflats for off-road tactical wheels
- Ballistic and impact-resistant materials

Runflat installed on a wheel

RODGARD® -RRF

- Premium Runflat
- Adjustable Hardware
- Runner - Roller design
- 1-Piece Wheels

VFI

- Fully Compliant Premium Performance Runflat
- 2-Piece Tactical Wheels

HMR

- Static runflat
- Non-adjustable Hardware

TMR

- Heavy Duty Runflat
- Rubber Beadlocks
- 2-Piece Tactical Wheels

CMRF

- Heavy Duty Composite Runflat
- Reinforced with Rubber Beadlocks
- 2-Piece Tactical Wheels

Hutchinson has provided runflat system solutions to the military and security markets since 1926. The Hutchinson family of Tactical™ runflats are relied upon worldwide to ensure mobility and safety in all-terrain and combat situations.

[Run-flats] "allowed High Mobility Multi-Purpose Wheeled Vehicles to travel up to 30 miles on completely flat tires allowing our Soldiers to remove themselves from hostile environments..."

-Kurt J. Stein, Major General, USA

► SAFETANK

The Hutchinson Safetank is protected by a specially developed self-sealing outer coating. Entry and exit holes seal instantly, retaining the fuel inside the tank and minimizing the potential ignition of spilled fuel.

Hutchinson Safetank capabilities:

- New vehicle designs
- Retrofit on existing platforms
- Protection of existing tanks

Vehicle fuel tanks are vulnerable to shots or punctures
