

ROAD WHEELS AND TRACK

Hutchinson and DST (formerly Diehl)

A partnership of the world's
leaders in military wheel and
track design.
Made in the USA

► High Performance

- Advanced rubber compounds.
- Improved heat resistance.
- Low vibration.
- More than **doubles** rubber tire and track pad service life on durability testing versus legacy track / road wheels.

► Light Weight

- Hundreds of pounds less than legacy track and road wheels.
- Less rolling resistance.
- Reduces fuel consumption.

► Increased OPTEMPO and Cost Reductions

- Less downtime in the field and motor pool breaking track.
- More time moving, training and fighting.
- M-1 tank track shoe replacement is the #1 cost for vehicle spares in the Army: \$78 million in 2015.
- Highly durable track will cut life cycle costs in half; saving tens of millions for the Army and unit budgets.
